A strong and self-motivated Software Engineer, experienced with large scale e-commerce as well as small, fine tuned websites. Development Manager with proven track in a large company using Agile efficiently.

WORK EXPERIENCE

Development Manager - Agoda Services Co., Ltd. 2014 - To date

Promoted Development Manager. Relevant duties performed:

- Complete the project I started as developer with my team. After completion the web-application was 75% faster on server-side performance
- Was given another team for cross-functional features
- Managed a team of up to 13 software engineers
- Recruiting, on-boarding program for new joiners
- Contributed to the constant evolution of the website:
  - Migration to use the back-end micro-services
  - Collecting product/business data and utilize it to make strategic decisions
  - Migration from KnockoutJS to ReactJS
- Collected team/scrum data and utilize it to transform a team relying on their manager to a self-organizing team (work currently in progress as of February 2019)
- Various contributions to company and Bangkok tech community:
  - Presenter of 2 Meetups in Bangkok: TypeScript training and Full Open-Source CI/CD for a netcore+reactjs application
  - Online training material (available within company learning system)

Senior Software Engineer - Agoda Services Co., Ltd. 2013 - 2014

- Development of Agoda website, operation support: ASP.NET, JQuery
- Re-write a part of the main funnel of the website:
  - ASP.NET MVC 5 and WebAPI
  - KnockOutJS (we needed support for legacy browsers)
  - Introduced better Dependency Injection via SimpleInjector (legacy was MS Unity)
  - Introduced automated code coverage (with maintained KPI of > 70%) and static code analysis with SonarQube

Technical Director - Yesijoin Co., Ltd. 2011 - 2013

- Designed and implemented www.yesijoin.com from scratch using J2EE technology:
  - web-application architecture, EJB 3.0 and JSF (Primefaces)
  - MySQL database
  - Integration with payment gateways(123 service, 2c2p, Paysbuy, KBank)
  - Email marketing via Amazon Email
  - Deployment on AWS instance
  - Automated testing with selenium
- Built a 3 developers team to bring more features to the website and implement 2 other websites (only one went live: allthaicoupons.com)
- Introduced Sonarqube and coding practice
- Created the electronics to support a live advertising system for a flash-mob event: a big box with a screen, a push button and an embedded printer was placed in a public area, we monitored with an IP camera and remote control to print free vouchers to people pressing the button until a count-down reached 0
- Created a web-crawler to collect condos/apartments for sale/rent information

TECHNICAL SKILLS

Software Engineering

Application at scale, Design Review / Code Review, Coding Standard / Static Code Analysis, Web-Security / OWASP

Software Development

ASP.NET, Netcore, Java (J2SE, J2EE), ReactJS, KnockoutJS, TypeScript, HTML/CSS
